Progress Report at the end of this week! (hopefully)

259/230

Which is 112% (A+)

Note that the above grade does not factor in participation (10% of your final grade).

Summary

This the table of your assignment points:

	Lab #1	Lab #2	Lab #3	TC #1	TC #2	TC #3	TC #4	Group #1	Group #2	Extra	Total	Percent
Pts.	30	32	30	32	32	30	30	20	18	5	259	93%
Max Pts.	30	30	30	30	30	30	30	30	50		230	

Individual assignments:

Lab Assignment #1

30/30

I'll send you an email with your current grade then!
If you are worried, more extra credit opportunities will be available!

Final Timing

Ideally: 20 minute presentations after the final lecture!

Final Timing

Time	
5:00	Group 1
5:20	Group 2
5:40	Group 3

Ideally: Will be 20 minute presentations after the final lecture!

Group Assignment #3

Group Name *

Your answer

Survey Form Link *

Please put the link to your survey here. Make sure you have sharing enabled.

Your answer

What option is your group choosing for the final project? *

- ☐ Option A - Prototype (Only surveying students in the class)
- ☐ Option B - Mapplication (Community members and class respondents)

Due 7/20: Survey + Memo Revisions!

Reductionism

As a society where we are at:

Where we need to be:

Technological Determinism

Technology

Society

Technology is the force that changes **society**

Technological Determinism

Technology

Society

“Phones will improve people’s life.”

Social Determinism

Technology

Society

Technology is a result of the **society**

Social Determinism

Technology

Society

“**People** created **phones** to talk easier.”

Main takeaway

Reductionism is problematic because it only re-aligns the balance in one direction.

**Wait.. This is a technology skills class..
Shouldn't we focus on technology solutions?**

No, because.. It leads to...

Techno-Fascism

Technocracy/Techno-Fascism

Fascism – Oppression of opposing thoughts

Technocracy – Rule by only those with expertise

Techno-Fascism = **Fascism** + **Technocracy**

Technocracy/Techno-Fascism

Techno-Fascism – Rule by those with expertise
that oppresses opposing thoughts

Techno-Fascism

‘Unstoppable’ AI raises concerns, need for regulation

By: Kathryn McNutt // The Journal Record // April 13, 2023

“Big tech, machine learning, AI is too big and inevitable, people cannot stand up against it.”

Techno-Fascism

OF FREEDOM

Hasta la vista freedom

What it really means is

“I have more ‘technical’ skills and know more than you, so I am better than you, do not resist.”

-Every Big Tech CEO

Resistance is futile.

Is there an alternative?

Holism

“Some process or phenomenon cannot be broken into parts, and can only be understood as a whole”

<https://cseweb.ucsd.edu/~goguen/courses/275f00/s2.html>

Reinforces the direct connection of technology and society.

Holism

Goes against western concepts of knowledge... but slowly being adopted, even in “hard sciences”

Reductionism vs Holism

Eastern perspectives on holism

Buddhism and Hinduism believe in a middle path to describing our decision-making by connecting it to consequence of our actions.

What AA-191-About us?

No surprise that this course is being taught in the Asian American Studies department then!

What AA-191-About us?

Your **mental health**, **ability to ask questions**, etc. allows the class to be better.

Holism in GIS?

Reductionism

Holism

Considering all we just covered....

How to apply **holism** to mapping, beyond just
Critical Cartography?

We will utilize two approaches

1. Tradition-based GIS
2. Design Justice

Focus on Tradition-based GIS

Tradition	Key Ideas	Example Publications
Queer(ing) Cartographies, GIS	• Recognize queer labor and lives present in production of knowledge/maps • Interrogate political, economic, and social relations present in software, algorithms, code used to produce maps	Brown & Knopp (2008); Giesecking (2018)
Marxist Cartography	• Visualize and map the contours of capital and state power • Interrogate how mapping serves interests of the state	Lacoste (1973); Toscano & Kindle (2015)
Indigenous Mapping	• Make claims upon ancestral lands to secure tenure and other rights • Simultaneously, potentially make said lands visible for looting and destruction	Chapin et al. (2005); Hunt (2013); see Figure 3

Practicing GIS that is rooted in empowering tradition and disempowering the institutions.

<https://gistbok.ucgis.org/bok-topics/cartography-and-power>

Design Justice

Practicing design that is centered on community-based justice.

<https://gistbok.ucgis.org/bok-topics/cartography-and-power>

In summary

Trying the same tactic of focusing on technology probably isn't going to solve our social problems because well...

These social problems are getting worse.

**My ethics on technology and society:
Iterating towards holistic solutions together.**

Quick Recap

First Lab – Building our house and painting it (**HTML / CSS**)

Second lab – Adding a laundry machine to a room in the house (**JavaScript**)

This lab – Letting some one visit our laundry room to use it! (**JavaScript**)

The Three Opens

- Open Source
- Open Standards
- Open Data

What Lab 3 is about!

We are working with a GeoJSON file, which is an Open Standard

What Lab 3 is about!

We'll be converting our survey data from GoogleSheets to GeoJSON next week!

Group Assignment #2

Memo

- Background on the social issue/campaign
- Goals
- Community/organization description
- At least 2 user stories
- 3 Ideas of questions to be included on the survey
- Future plans

2 pages MAX!!!!

Assignments

Due Monday 7/13:

- 1. Thinking Cap #3**
- 2. Weekly Readings**

Due Wednesday 7/15:

- 1. Lab #3**
- 2. Group Assignment #3 – Memo Revisions**
